example

The Flying Cloud had a number of coops for chickens and turkeys. A letter mentioning the coops was published in Lion. The letter said

*The Flying Cloud carried chicken coops to supply fresh meat for the voyage which were, in fair weather, slung outboard over the gun'ls.*

I have not found any reference that indicates how many coops there were or where the coops were stored. But I would expect them to be stored on deck since the smell would be unpleasant below decks.

The coop shown here is based on the coops on the *Cutty Sark*.

FLYING CLOUD - CHICKEN COOP
